

This drawing has not been developed to the same level as M-1 or M-2 because of potential environmental issues regarding elevating IH 35E over the Houston Street Viaduct near downtown. If these issues can be resolved, the design of the frontage and collector-distributor roads will be included and would be similar to those shown in M-2.

**PRELIMINARY:**  
**Subject to Revision**

- Mainlane
- HOV
- Direct Connector
- Ramp
- Collector/Distributor
- Surface Street

**Alternative**  
**M-4**
